

Karl himself is a craftsman who turns his tree removals into beautiful and functional pieces of reclaimed wood furniture, which he has lovingly coined 'Flyntstone Furniture'.

I love giving the trees a second life.

Each piece of reclaimed wood furniture that Karl produces is a unique and special work of art. Whether you were wanting a rustic coffee table or some unique chairs for your patio, Karl can create the impressive wood furniture that you're looking for.

Besides the fact that reclaimed wood furniture is unique and beautiful, it is also sustainable. Karl does not purchase the wood from some dealer, he creates each unique piece from wood harvested from his tree removal services in and around Tucson. He gives the trees a “second life” by turning them into a treasured possession. If you are environmentally conscious, Karl's reclaimed wood furniture would be a great option for you.

Each piece is made with painstaking care by Karl himself. As he likes to point out, he is not a factory. Many hours go into making each piece of reclaimed wood furniture and each one is different and has its own story. Why not buy a piece of furniture made from local trees and produced locally, with more of a story than being “Made in China.”

Karl's 'Flyntstone Furniture' is a great way to add some Tucson artistic flare to your garden, porch, yard or home.

If Karl is performing a tree removal for you, please feel free to ask him about making you a unique piece from the reclaimed wood.

Call today to set up a time to view Karl's 'Flyntstone Furniture' or to explore other options.
